AI & Data Product Leader | Model Evaluation, Reporting & Scalable Data Systems

Profile

Data and operations leader with experience building and scaling data systems, reporting, and decision-support processes in complex organisations. Proven history of turning incomplete or messy data into clear, actionable insights for senior stakeholders, while setting up the teams, workflows, and governance needed to deliver at scale. Experienced in data product ownership, technical delivery, and people management, with a strong interest in applying these skills to mission-driven work in conservation, climate, public health, or education.

Career

Bloomberg LP — London, UK

Data Product Owner, AskB

Feb 2025 – Current

- Product owner for AI evaluation and data pipelines supporting Bloomberg's flagship AI product, [AskB](#), an AI agent for finance professionals used in research, analysis, and decision-making.
- Designed and owned end-to-end model evaluation frameworks, including dataset curation, SME labelling strategies, LLM-based judges, and heuristic quality controls.
- Led release go / no-go recommendations for AI models and features, directly informing CEO- and CTO-level product decisions.
- Scaled evaluation operations from 17 to ~100,000 external users within one year, supporting confident public release of AI capabilities.
- Reduced evaluation turnaround from days to hours, increasing throughput from ~150 low-quality annotations per week to 2,500+ high-quality SME judgements in as little as three days.
- Established executive-ready reporting infrastructure (Python reports, QlikSense, Superset, PDFs, and presentations), consumed by 250+ senior engineers, product managers, and executives.
- Acted as interface between Engineering, Product, and Executive leadership, translating complex AI performance into actionable decisions.

Analyst & Team Leader, Data Support

Apr 2021 – Feb 2025

- Led, hired, and managed up to 27 team members, owning performance management, roadmap planning, and strategic direction across data and operations.

Proximity — London, UK

Nov 2020 – Apr 2021

Assistant Sales Manager / Data Analyst

- Built end-to-end reporting suites and data pipelines using Python, SQL, VBA, and BI tools for internal and external stakeholders.

Centre for Finance, Technology and Entrepreneurship — London, UK

Jan 2020 – Nov 2020

Operations Data Analyst

- Led organization-wide data strategy and designed analytics workflows across operations, growth, and sales.

Rewe Far East Ltd — Hong Kong

Sep 2016 – Jul 2018

Trainee.

Rotated through core departments such as Management, Merchandising, Accounting, CSR, IT & QA.

- Delivered process optimisation initiatives and built internal tools, including a testing laboratory saving >\$80k annually.
